

Please do not stop regulating broadband services as Bell South's petition is asking!

I greatly value my ability to choose a small, local ISP and their present ability to neg-

otiate prices with SBC. I don't want to deal with a large telephone company. My ISP

gives excellent service, is honest, and doesn't use devious come-ons to get people

hooked and then raise prices after an introductory offer. I trust, and want them as my ISP, and I trust their pricing policy, which is honest and fair.
